Richard Andreas Werner (born January 5, 1967) is a German economist who is a professor at the University of Southampton.. Werner proposed the term quantitative easing, as well as the expression "QE2" in 2009 to refer to the need to implement true quantitative easing as an expansion in credit creation. He has also proposed the "Quantity Theory of Credit", which disaggregates credit creation ...

## US Business Cycle Expansions and Contractions

A steady-state economy is an economy made up of a constant stock of physical wealth (capital) and a constant population size. In effect, such an economy does not grow in the course of time. The term usually refers to the national economy of a particular country, but it is also applicable to the economic system of a city, a region, or the entire world.

The central point of my Jacobin piece on the state of economics was meant to be: Whatever you think about mainstream macroeconomic theory, there is a lot of mainstream empirical and policy work that people on the left can learn from and engage with – much more than there was a decade ago. 1 . Some of the most interesting of that new work is from, and about, central banks.
