Ecological Site Classification : Amend site/management variables below then click on map for species suitability analysis.

Forest Research Decision Support Tools Portal v2.0

In ecology, a habitat is the type of natural environment in which a particular species of organism lives. It is characterized by both physical and biological features. A species' habitat is those places where it can find food, shelter, protection and mates for reproduction.

Habitat - Wikipedia

Big Sur is a rugged and mountainous section of the Central Coast of California between Carmel Highlands and San Simeon, where the Santa Lucia Mountains rise abruptly from the Pacific Ocean. It is frequently praised for its dramatic scenery. Big Sur has been called the "longest and most scenic stretch of undeveloped coastline in the contiguous United States," a "national treasure that demands ...
